

TAX IN EVERYONE'S LANGUAGE.

About Regan van Rooy

Established in 2016, our team consists of seasoned experts from the Big Four, dedicated to guiding you through all aspects of tax compliance, tax structuring, and tax planning. We provide clear, actionable answers tailored to your specific needs, ensuring swift and flexible delivery. With strategically located offices in South Africa, Mauritius, Ireland, and the UK, we combine local expertise with a global reach to effectively solve any tax challenge.

We're not your usual advisory firm, and many of our team have "real life" in-house tax experience, so we understand the unique challenges facing tax teams in multinational groups, with the ever-increasing tax complexity and compliance requirements and often insufficient resources. That's why we have designed a special offering specifically to help heads of taxes better manage their portfolios and to sleep easier at night.

Tax Director On Call

Imagine having your very own tax guardian angel. An experienced tax partner who can assist you with any query, large or small, in real-time. No need for specific scoping, engagement letters or fee discussions every time you need help – rather you get on-tap support when and how you need it.

Whether it's reviewing complex tax returns, managing a revenue audit, considering the impact of new tax legislation or helping you plan a group restructure, we are your tax director on call. You'll have your own dedicated partner, working for you and leveraging our combined specialist expertise to give you real solutions in record time.

What We Offer

We offer a range of packages, from ad hoc support at favourable hourly rates to monthly retainer agreements. You will have a dedicated tax director, i.e. a partner-level resource, who will be your point of contact and leverage our specialist experts on all tax matters including customs, VAT, transfer pricing and employees' tax to give you fast, practical answers in a format to suit you.

Our People

Our team specialises across service areas, allowing us to work with your business to deliver rapid, pragmatic results in our respective fields. We focus on giving answers, not just opinions, based on your unique business situation and drivers – one size does not fit all.

Caoilfhionn van der Walt
